sec4dev

**sec4dev Conference and Bootcamp**

a high-quality security conference for people involved in software development and interested in making their code more secure and sustainable.

https://sec4dev.io/

sec4dev

# Our mission

Making security a first-class citizen in the world of software development.

# Made for makers

We focus on practical, applicable, hands-on, and security-related contents for folks involved in software development.

Software developers, testers, software architects, software development team and project leads, CTOs and CISOs in software-focused organizations, software operators and maintainers, quality managers

# Why sponsoring sec4dev?

Benefit from an exclusive audience of people involved in software development and interested in security.

Tailored sponsorship packages are possible.

**Brand awareness**
**Employer branding**
**Pre- and post-event exposure**
**Technologies & product placement**
**… and so much more**

# Sponser a diversity grant

Diversity in information technology is still an issue.

**Give** an underrepresented software developer
**the chance** to attend sec4dev 2020 and
**connect** with like-minded.

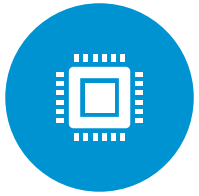
Your contribution finances the participation of a diversity grant applicant who has been selected in advance by a jury.

Price*: 920€ (ticket and travel expenses)

* All prices are shown exclusive of added tax (net prices). Invoices will be issued with 20% VAT

sec4dev

# Topics 2020

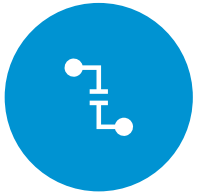


Secure coding, design, and architecture

Threat modeling

Secure development process

IoT security



Continuous integration and DevSecOps

Container security

Cloud security

# Philippe De Ryck, Keynote

*Founder of Pragmatic Web Security, Google Developer Expert*

Philippe De Ryck helps developers protect companies through better web security. As the founder of Pragmatic Web Security, he travels the world to train developers on web security and security engineering. His Ph.D. in web security from KU Leuven lies at the basis of his exceptional knowledge of the security landscape. Google recognizes Philippe as a Google Developer Expert for his work on security in Angular applications.
