sec4dev Conference & Bootcamp

A high-quality security conference for people involved in software development and interested in making their code more secure and reliable.

<https://sec4dev.io/>

Our Mission

Making security a first-class citizen in the world of software development.

Made for Makers

We focus on practical, applicable, hands-on, and security-related contents for folks involved in software development.

software developers, testers, software architects, software development team and project leads in software-focused organizations, software operators and maintainers, quality managers

Keynote by Clint Gibler

Head of Security Research, r2c

Session: Scaling AppSec

This talk will explore the power of secure defaults and how to embrace them in your company. We'll also discuss how this same approach and mindset can be used to raise code quality (e.g. performance, robustness, correctness) and code standards across your org, help onboard new developers more quickly, and more.

Closing-note by Susan McGregor

*Associate Research Scholar, Columbia University's
Data Science Institute*

Into the Breach: Strategies for Fully-Scoped Security

Drawing on concepts from disaster recovery and harm reduction, this talk will explore the practical implications of considering the aftermath of a security incident during the software development process. From technical approaches like encryption and authentication to more design and policy-oriented strategies like data minimization, the goal of this talk is to empower developers to have meaningful conversations with stakeholders about what it means to take a fully-scoped approach to security for real-world applications.

First time live in Vienna!

Tanya Janca

Bootcamp A: Building an Application Security Program

In this workshop we will build from scratch or add onto your existing application security program / secure system development life cycle (SSDLC).

Talk: Building Security Champions

With security teams being vastly outnumbered many organizations have responded to this challenge with different program scaling methods, including building security champions programs. Which leads us to questions; How does a security champions program work? How do you select your champions? And once you have them, what do you DO with them?

sec4dev 2022

TU Wien

Talks, Discussions, Networking, Bootcamps, Social Events

This year's main topics are:

**Application Security >> Secure Identity >> Secure SDLC >>
DevSecOps >> Cloud Security >> IoT Security**

Why sponsoring sec4dev?

Benefit from an exclusive audience of people involved in software development and interested in security.

Tailored sponsorship packages are available.

- > **Brand awareness**
- > **Employer branding**
- > **Pre- and post-event exposure**
- > **Technologies & product placement**
- > **... and so much more**

Sec4dev 2022

What to Expect

- > 300 international participants
- > 4 days
- > 3 bootcamps
- > 14 talks
- > breakout sessions with expert Q&A
- > 2 extra sessions for free
- > 2 Social events

	Main Sponsor	Platin	Gold	Silver	Bronze
Keynote and closing note powered by you	< >				
Logo on 400 postcard invites as main sponsor	< >				
Listed as Main/Platin sponsor (social media, website, invites, media activities)	< >	< >			
Pub Quiz powered by you	< >	< >			
Co-moderator of 1 breakout session	< >	< >	< >		
Image video in the spirit of sec4dev (2min) during coffee breaks	< >	< >	< >		
1 session powered by you	< >	< >	< >		
Tabletop exhibit space if desired	< >	< >	< >		
Coffee break supported by company, displaying logo or rollup	< >	< >	< >	< >	
1 meetup powered by you (1000+ members)	< >	< >	< >	< >	
Access to attendees during the conference*	< >	< >	< >	< >	
Including in social media activities (more info here)	< >	< >	< >	< >	
Listed on sec4dev website	< >	< >	< >	< >	< >
Free tickets	2	2	1	1	Discount
Price**	5.500€	4.000€	3.000€	1.500€	750€

* sec4dev will not share personal data of participants with sponsors or any other third parties.

** All prices are shown exclusive of added tax (net prices). Invoices will be issued with 20% VAT.

Sponsor Packages

Sponsor a diversity grant

Diversity in information technology is still an issue.

Give an underrepresented software developer
the chance to attend sec4dev 2022 and
connect with like-minded.

Your contribution finances the participation of a diversity grant applicant who has been selected in advance by a jury.

Price*: 920€ (conference ticket and travel expenses)

Social Media Interactions

Our SBA and sec4dev channels include:

- > LinkedIn: 1065
- > Twitter: 1870
- > Meetup: 1000+
- > Newsletter: 700 +
